Providing Cloud Infrastructure (IaaS)

About the Service/Feature

Providing convenient, on-demand access to a shared pool of configurable computing resources (e.g. networks, servers and storage), with a centralized deployment model, compute and storage resources enabling rapid service provision and launch with minimal management effort or interaction with service provider. The overall objective is to create a more agile federal enterprise where services can be provisioned on demand to meet government compute requirements. The service provides the following features: - Data migration feature (self-service): linking the government entity with FedNet so that the entity's business can be migrated from its location to FedNet using VMware Cloud Migration tools - The entity's infrastructure must be compatible with VMware technology - VPN feature (Self-Service): The secure virtual networking (VPN) feature within FedNet cloud enables the entity's employees to benefit from their corporate services remotely. In addition, the feature can be utilized as a site to site VPN termination point for the entities to connect to FedNet.

Service steps

Step 1 ➜ Register with UAE Pass

Step 2 ➜ Submit a service request

Step 3 ➜ Fill-in the onboarding form

Step 4 ➜ TDRA will review the request and the form

Step 5 ➜ Receive the service

Category	Variation
Type	Transactional
Expected Time	One working day
Fees	Free of charge
Audience	Government Entities
About	Providing convenient, on-demand access to a shared pool of configurable computing resources (e.g. networks, servers and storage), with a centralized deployment model, compute and storage resources enabling rapid service provision and launch with minimal management effort or interaction with service provider.
